

to 32 member countries; several non-member countries have been persuaded to apply export controls consistent with one or more of the regimes unilaterally; and most of the members of the nonproliferation regimes have applied national "catch-all" controls similar to those under the U.S. Enhanced Proliferation Control Initiative. (Export controls normally are tied to a specific list of items, such as the MTCR Annex. "Catch-all" controls provide a legal basis to control exports of items not on a list, when those items are destined for WMD/missile programs.)

United States export controls, especially "catch-all" controls, also make important political and moral contributions to the nonproliferation effort. They uphold the broad legal obligations the United States has undertaken in the Nuclear Nonproliferation Treaty (Article I), Biological Weapons Convention (Article III), and Chemical Weapons Convention (Article I) not to assist anyone in proscribed WMD activities. They endeavor to assure there are no U.S. "fingerprints" on WMD and missiles that threaten U.S. citizens and territory and our friends and interests overseas. They place the United States squarely and unambiguously against WMD/missile proliferation, even against the prospect of inadvertent proliferation from the United States itself.

Finally, export controls play an important role in enabling and enhancing legitimate trade. They provide a means to permit dual-use export to proceed under circumstances where, without export control scrutiny, the only prudent course would be to prohibit them. They help build confidence between countries applying similar controls that, in turn, results in increased trade. Each of the WMD nonproliferation regimes, for example, has a "no undercut" policy committing each member not to make an export that another has denied for nonproliferation reasons and notified to the rest—unless it first consults with the original denying country. Not only does this policy make it more difficult for proliferators to get items from regime members, it establishes a "level playing field" for exporters.

#### THREAT REDUCTION

The potential for proliferation of WMD and delivery system expertise has increased in part as a consequence of the economic crisis in Russia and other Newly Independent States, causing concern. My Administration gives high priority to controlling the human dimension of proliferation through programs that support the transition of former Soviet weapons scientists to civilian research and technology development activities. I have proposed an additional \$4.5 billion for programs embodied in the Expanded Threat Reduction Initiative that would support activities in four areas: nuclear security; nonnuclear WMD; science and technology nonproliferation; and military relocation, stabilization and other se-

curity cooperation programs. Congressional support for this initiative would enable the engagement of a broad range of programs under the Departments of State, Energy, and Defense.

#### EXPENSES

Pursuant to section 401(c) of the National Emergencies Act (50 U.S.C. 1641(c)), I report that there were no specific expenses directly attributable to the exercise of authorities conferred by the declaration of the national emergency in Executive Order 12938, as amended, during the period from May 15, 1999, through November 10, 1999.
